TEMPLATE

FOR

plantable pillow box

Follow these easy steps to create an eco-friendly pillow box that your guests can plant and grow wildflowers:

1. Cut out the template and affix to a sheet of [plantable paper \(http://www.botanicalpaperworks.com/category/Plantable+Seeded+Paper/12/\)](http://www.botanicalpaperworks.com/category/Plantable+Seeded+Paper/12/).
2. Trace and cut out the plantable paper.
3. Using a bone folder or blunt knife, score the paper along the fold lines.
4. Fold and apply a thin layer of glue to the flap. Seal shut.

Fill the pillow boxes with treats and be sure to tell your guests that they can plant the paper in soil and grow a beautiful bouquet of wildflowers. [See pictures of paper in bloom here.](#)
